PROFESSIONAL PROFILE

Software Developer with over 2 years of experience in the design, development, and maintenance of web, mobile, and desktop applications. Specialized in the JavaScript/TypeScript ecosystem (React, React Native, Node.js), with a strong focus on creating high-quality user experiences (UX/UI) and on technology migration to ensure the scalability and stability of products. Passionate about agile methodologies, solving complex problems, and implementing functional tests that ensure robust and reliable software.

TECHNICAL SKILLS

- **Frontend:** React.js, React Native, Electron.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS, Tailwind CSS, Chakra UI.
 - **State Management:** Redux, TanStack Query (React Query).
 - **Backend & Databases:** Node.js, Python (Flask, Django), MySQL.
 - **Testing & QA:** Functional Tests (Web, Móvil, Escritorio), Bug Documentation, Incident Tracking.
 - **Tools & Methodologies:** Git, GitHub, Agile Methodologies (Scrum), CI/CD, Troubleshooting.
-

WORK EXPERIENCE

Software Developer | Seguridad Penta – Bartik | Bogotá, Colombia

Mayo 2025 - Present

- I led the planning and implementation of UX/UI improvements across a suite of web, mobile, and desktop applications, optimizing key workflows and resulting in a significant improvement in usability and user satisfaction.
- I led the migration and technological upgrade of critical systems, improving the stability, compatibility, and maintainability of the codebase while reducing technical debt.
- I designed and implemented the front-end architecture and user experience for three SaaS applications from scratch, integrating REST APIs and developing intuitive interfaces for digital products.
- I established and executed cross-platform functional testing processes, documenting, reporting, and tracking issues, which raised the software's quality standards.

Front-End Developer | Attendv-Betek | Medellín, Colombia

Mayo 2024 – Octubre 2024

- Developed a complete web application for on-demand services using React and Firebase, implementing dynamic features that improved user interaction.
- Optimized the application's performance and SEO by implementing efficient coding strategies and best practices, resulting in improved loading speed and search engine visibility.
- Set up and implemented Continuous Integration and Continuous Delivery (CI/CD) pipelines, automating deployment processes and ensuring a more agile and efficient workflow for the team.

Software Developer (Freelance) | Autonomic Mind | Medellín, Colombia

Septiembre 2023 – Octubre 2023

- I developed software solutions using multiple programming languages (Dart, Kotlin, R, Lua), applying functional programming principles and recursion to solve specific business challenges..
- I implemented a version control system using Git in a collaborative environment, facilitating code integration and teamwork.

Software Developer (Trainee) | Holberton School | Bogotá, Colombia

Septiembre 2022 – Julio 2023

- I developed complete full-stack projects as part of an intensive program, using technologies such as React, Python (Flask), and MySQL, which allowed me to understand the entire software development lifecycle.
- I implemented unit and integration tests to ensure the quality and robustness of the code in all projects.
- I completed over 100 exercises on logic, algorithms, and data structures, significantly strengthening my

problem-solving and code optimization skills.

EDUCATION

- **Betek - Front-End Developer** | *Noviembre 2024*
 - **Holberton School – Software Developer** | *Julio 2023*
-

LANGUAGES

- **Español:** Nativo
- **Inglés:** Intermedio (B1) - Ability to read technical documentation.
